

CPSC 304 Project Cover Page

Milestone #: **4**

Date: **December 1, 2023**

Group Number: **107**

Name	Student Number	CS Alias (Userid)	Preferred E-mail Address
Nelson Li	32900045	s8i3z	nelsonli2323@gmail.com
Nathan Chan	24965287	a1s7u	nchan315@student.ubc.ca
Kennedy Yung	46714952	a0b7q	kennedyyung@gmail.com

By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

Project Description

Our project is about modeling PC components to allow users to understand how different parts of a PC work together and what is required to create your own PC. Using this database, users will be able to look up the price of different PC parts and customize their own PC. They can add parts to the tables to keep track of the parts that they want and get some summary query results from the parts they have added such as filtering for keyboards by their brand, colour, percentage and price, finding keyboards and mice that have the same colour or brand, and finding the average, maximum, or minimum price of GPU(s) based on brand or number of fans.

Changes in Schema

We had to remove the table Mouse_Brand because the Oracle account we were provided with only allowed us to have a maximum of 30 tables. If we included Mouse_Brand, we would have 31 tables which would exceed the space quota we are given to work with in Oracle. We chose to remove this table as it seemed to be a little trivial and we assumed it would not affect the final project much.

Schema

CPUCooler_On_Model(Model, Lighting, Brand, CPUCooler_Type, LCD)

CaseFan_Inside_Model(Model, Brand, Lighting)

CPU_On_Power(Cores, Generation, Power)

Motherboard_Powers_Socket(CPU_Model, Socket)

Storage_Requires_RW_Speeds(Model, Read_Speeds, Write_Speeds, Brand)

Storage_Requires_Price(Model, Capacity, Storage_Type, Price)

RAM_Placed_On_Brand(Model, Brand)

Mouse(Model, Colour, Branch, Mouse_Size, Weight, Price, Wired_Wireless)

Keyboard(Model, Brand, Colour, Price_Percentage)

Switches(Model, Brand, Colour, Sound)

Switches_Price(Model, Brand, Colour, Price)

GPU_Has_Model(Model, Fans)

GPU_HAS_Price(Model, Brand, Variant, VRAM, Design, Fans, Series, Price)

GPU_Has_Power(Model, VRAM, Fans, Power)

University of British Columbia, Vancouver

Department of Computer Science

RAM_Placed_On_Power(DDR, Capacity, Power)

PowerSupply_In_Model(Model, Brand, Efficiency, Wattage)

Case_Contains(Model, Colour, Case_Size, Price)

PowerSupply_In(Model, Modularity, Form_Factor, Price, **Case_Model**, **Case_Colour**, **Case_Size**)

Motherboard_Powers_Socket(Model, Form_Factor, Series, WIFI, Brand, Power, Expansion_Slots, Price, Memory_Slots, DDR, Storage_Ports, **PSU_Modularity**, **PSU_Form_Factor**, **PSU_Model**, **Case_Model**, **Case_Colour**, **Case_Size**)

CPU_On(Model, Cores, Generation, Socket, Price, Brand, **MB_Model**, **MB_Form_Factor**, **MB_Series**, **MB_WIFI**)

CPUCooler_On(Model, CPUCooler_Size, Price, **CPU_Model**)

CaseFan_Inside(Model, CaseFan_Size, Price, Colour, **Case_Model**, **Case_Colour**, **Case_Size**)

Storage_Requires(Model, Capacity, Interface, Storage_Type, Form_Factor, Power, **MB_Model**, **MB_Form_Factor**, **MB_Series**, **MB_WIFI**)
